PROJECTS

Equity Elite: A Social media platform for traders | *React, NodeJs, ExpressJs, MongoDB* July – Aug 2026

- Delivered live stock price updates via WebSockets – applicable to trading dashboards and market monitoring.
- Developed an interactive community space for users, implementing CRUD operations for posts and user profiles.
- Secured user authentication and authorization using **JSON Web Tokens (JWT)** and **bcrypt** for password hashing.
- Designed and deployed **RESTful APIs** on Render with a **Model-View-Controller (MVC)** architectural pattern.
- Hosted the frontend using Firebase for high availability and implemented **OAuth 2.0** for secure third-party login.

Ascend Learn: A gamified learning app | *React, TypeScript, Tailwind, Supabase* Sep 2025 – Oct 2025

- Built **Ascend Learn**, a gamified learning platform with AI-powered quizzes, badges, streaks, leaderboards, and certificates to boost learner engagement.
- Developed a responsive frontend using **React, TypeScript, Tailwind CSS**, and **shadcn/ui**, with client-side routing across dashboard, modules, quiz, and analytics pages.
- Integrated **Supabase** for secure authentication and protected routes, and **TanStack React Query** for efficient server-state management.
- Visualized learner progress with interactive **Recharts** analytics and implemented **React Hook Form** with **Zod** for robust form validation.

Personal Portfolio: A responsive developer portfolio | *React, JavaScript, Vite, CSS, EmailJS* Sep 2026

Integrated EmailJS to enable visitors to send messages directly through the portfolio contact form.

Implemented reusable React components and React Router for smooth navigation across the website, with responsive layouts for desktop and mobile devices.

Developed a responsive personal portfolio website using React and Vite to showcase technical skills, projects, education, and professional profile.
